Seeds Grow: Reading Comprehension

Nonfiction: Science · about 40 words

Read the story. Then answer the questions. Circle the best answer or write it on the line.

🌱 Seeds Grow

A plant starts as a seed. Put the seed in soil. Give it water and sun. Soon a tiny root grows down. A small stem grows up. Then leaves grow. The plant keeps getting bigger. Some plants grow flowers and new seeds.

1. **Main idea:** What is this mostly about?
   A. why the sun is hot B. how to cook beans C. how a seed grows into a plant

2. **Detail:** Where do you put a seed?
   A. in soil B. in the freezer C. in a box

3. **Detail:** What does a seed need to grow?
   A. water and sun B. snow and ice C. candy and milk

4. **Sequence:** What grows down first?
   A. a leaf B. a flower C. a tiny root

5. **Vocabulary:** In this passage, soil means...
   A. dirt that plants grow in B. a kind of seed C. a big flower

6. **Sequence:** What grows after the stem?
