Lighthouses: Reading Comprehension

Nonfiction: Places · about 90 words

Read the passage. Then answer each question. Circle the best answer or write your answer on the lines.

Lighthouses

A lighthouse is a tall tower near the ocean or a big lake. At the top is a very bright light. At night or in fog, the light shines out over the water. It warns ships to stay away from rocks and shallow water.

Long ago, lighthouse keepers lived in or next to the lighthouse. They climbed the stairs every night to light the lamp. Today, most lighthouses work on their own with electric lights. The tallest lighthouse in the United States is Cape Hatteras Lighthouse in North Carolina.

1. **Main idea:** What is this passage mostly about?
   A. sailboats B. lighthouses C. fishing

2. **Detail:** Where are lighthouses built?
   A. near the ocean or a big lake B. in the desert C. in the middle of cities

3. **Detail:** What does the light warn ships about?
   A. other lighthouses B. storms in space C. rocks and shallow water

4. **Detail:** What did lighthouse keepers do long ago?
   A. built boats B. climbed the stairs to light the lamp C. sailed the ships

5. **Detail:** What is the tallest lighthouse in the United States?
   A. the Statue of Liberty B. the Space Needle C. Cape Hatteras Lighthouse

6. **Inference:** How do most lighthouses work today?
