🤖 The Robot Contest

For weeks, Kenji and his partner Ruby had worked on their robot for the district robotics contest. The challenge was to build a robot that could pick up three plastic cups and stack them into a pyramid in under two minutes.

Their robot, which they named Clawdia, worked perfectly at home. But at the contest, disaster struck. During the practice round, Clawdia's gripper snapped off. Ruby stared at the broken pieces. "It's over," she said. "We should just go home."

Kenji looked around the gym. Other teams were busy, but a girl from another school was watching them. "I have extra rubber bands and zip ties," she offered. "Want them?"

With twenty minutes until their turn, Kenji and Ruby got to work. They used the zip ties to reattach the gripper and the rubber bands to help it squeeze. It wasn't pretty, but when they tested it, Clawdia lifted a cup.

In the final round, Clawdia stacked the pyramid in one minute and forty seconds. They didn't win first place, but the judges gave them a special award for "Best Problem Solving." Afterward, Kenji and Ruby found the girl and thanked her. She smiled. "Next year, we'll be competing for first," she said.

1 **Main idea:** What is the story mostly about?

A. a girl wins first place in a race B. two friends build a pyramid

C. two students fix their broken robot and keep going in a contest D. a robot runs away from school

2 **Detail:** What was the challenge?

A. answer math questions B. draw a picture C. pick up three cups and stack them into a pyramid

D. race across the gym

3 **Detail:** What broke during practice?

A. the wheels B. Clawdia's gripper C. the batteries D. the computer

4 **Character:** How did Ruby feel when the gripper broke?

A. discouraged and ready to quit B. angry at Kenji C. excited D. proud

5 **Detail:** What did the girl from another school offer?

A. extra rubber bands and zip ties B. her place in line C. a new robot D. a ride home

6 **Inference:** Why did the judges give them the "Best Problem Solving" award?

Their robot, which they named Clawdia, worked perfectly at home. But at the contest, disaster struck. During the practice round, Clawdia's gripper snapped off. Ruby stared at the broken pieces. "It's over," she said. "We should just go home."

Kenji looked around the gym. Other teams were busy, but a girl from another school was watching them. "I have extra rubber bands and zip ties," she offered. "Want them?"

With twenty minutes until their turn, Kenji and Ruby got to work. They used the zip ties to reattach the gripper and the rubber bands to help it squeeze. It wasn't pretty, but when they tested it, Clawdia lifted a cup.

In the final round, Clawdia stacked the pyramid in one minute and forty seconds. They didn't win first place, but the judges gave them a special award for "Best Problem Solving." Afterward, Kenji and Ruby found the girl and thanked her. She smiled. "Next year, we'll be competing for first," she said.

1. **Main idea:** What is the story mostly about?
   A. a girl wins first place in a race B. two friends build a pyramid
   C. two students fix their broken robot and keep going in a contest D. a robot runs away from school

2. **Detail:** What was the challenge?
   A. answer math questions B. draw a picture **C. pick up three cups and stack them into a pyramid**
   D. race across the gym

3. **Detail:** What broke during practice?
   A. the wheels **B. Clawdia's gripper** C. the batteries D. the computer

4. **Character:** How did Ruby feel when the gripper broke?
   A. discouraged and ready to quit B. angry at Kenji C. excited D. proud

5. **Detail:** What did the girl from another school offer?
   A. extra rubber bands and zip ties B. her place in line C. a new robot D. a ride home

6. **Inference:** Why did the judges give them the "Best Problem Solving" award?
   They fixed their broken robot quickly with simple materials and still finished.
