✏️ Explain it! Write two facts you learned about animal groups.

ANSWER KEY

Animal Groups: Learn and Practice (answers)

Packs, herds and schools work together

Read each question. Circle the best answer.

1 🦓 How does living in a herd help a zebra?

A. It makes grass grow B. It makes zebras taller

C. It gives them stripes

D. More eyes watch for lions

With many zebras looking around, someone is more likely to spot danger and warn the others.

2 🦁 What can lions do because they live in a group called a pride?

A. Build dams B. Fly to new places

C. Make honey **D. Hunt large animals together**

By hunting as a team, lions can catch big animals that one lion could not catch alone.

3 🐝 Honeybees live together in a...

A. Den B. Pond **C. Hive** D. Burrow

Thousands of bees share a hive, and each bee has a job to do.

4 🐋 A group of whales is a pod. How might a pod help a baby whale?

A. It warms the ocean

B. It turns the baby into a fish

C. Adults protect and guide it

D. The baby must swim alone

Adults in the pod stay close to the calf, keep it safe and show it where to find food.

5 🐟 What is a group of fish swimming together called?

A. A pride B. A pack C. A herd **D. A school**

Fish swim in schools. Staying close together helps keep them safe.

6 Why do many animals live in groups?

A. To change color B. To sleep forever

C. To stop growing **D. To stay safe and find food**

Groups help animals protect each other and find food. Teamwork helps them survive!

7 🐺 What is a group of wolves called?

A. A hive **B. A pack** C. A school D. A flock

Wolves live and hunt in a pack. Working together helps them catch food.

8 🦬 A group of cows or bison is called a...

A. School B. Pod C. Swarm **D. Herd**

Big grazing animals like cows and bison live in herds.
