Human Impact on Earth: Learn and Practice

How our choices affect land, water and air.

Read each question. Circle the best answer.

💡 Human Impact

- People change the environment through farming, building, mining and pollution.
- Some changes harm habitats, water and air.
- Engineers and citizens design solutions to reduce harm.
- plastic litter in rivers: cleanups and less single use plastic

1 Which of these is a type of air pollution?

A. Steam from a kettle B. Smoke from burning fuel

C. Oxygen from plants D. Water vapour from a lake

2 🌱 What does reforestation mean?

A. Paving roads B. Cutting more trees

C. Planting trees where forests were cut

D. Building cities

3 Which choice helps reduce waste?

A. Reusing containers B. Using more packaging

C. Throwing out good food D. Littering

4 What is habitat loss?

A. When animals grow up

B. When animals move to a zoo

C. When places animals live are destroyed

D. When animals hibernate

5 Why do cities often feel hotter than nearby countryside?

A. Cities have more wind B. People breathe hot air

C. Cities are closer to the Sun

D. Pavement and buildings absorb heat

6 🪓 What is deforestation?

A. Watering gardens B. Planting new forests

C. Studying deserts D. Clearing large areas of forest

7 Why can fertilizer runoff harm a lake?

A. It makes water cleaner B. It adds extra oxygen

C. It cools the lake

D. It makes algae grow out of control

8 Which action pollutes water?

A. Recycling cans B. Planting trees

C. Dumping oil down a storm drain D. Turning off taps

ANSWER KEY

Human Impact on Earth: Learn and Practice (answers)

How our choices affect land, water and air.

Read each question. Circle the best answer.

1 Which of these is a type of air pollution?

A. Steam from a kettle **B. Smoke from burning fuel**
C. Oxygen from plants D. Water vapour from a lake

2 🌱 What does reforestation mean?

A. Paving roads B. Cutting more trees
C. Planting trees where forests were cut
D. Building cities

3 Which choice helps reduce waste?

A. Reusing containers B. Using more packaging
C. Throwing out good food D. Littering

4 What is habitat loss?

A. When animals grow up
B. When animals move to a zoo
C. When places animals live are destroyed
D. When animals hibernate

5 Why do cities often feel hotter than nearby countryside?

A. Cities have more wind B. People breathe hot air
C. Cities are closer to the Sun
D. Pavement and buildings absorb heat

6 🪓 What is deforestation?

A. Watering gardens B. Planting new forests
C. Studying deserts **D. Clearing large areas of forest**

7 Why can fertilizer runoff harm a lake?

A. It makes water cleaner B. It adds extra oxygen
C. It cools the lake
D. It makes algae grow out of control

8 Which action pollutes water?

A. Recycling cans B. Planting trees
C. Dumping oil down a storm drain D. Turning off taps
