Electricity: Match the Meaning

Grade 4 vocabulary: circuit, current, conductor, insulator and more

Read each meaning. Write the letter of the meaning next to the word it matches.

A. a place in a wall where you plug things in
B. a material that lets electricity flow through it
C. a material that blocks electricity
D. the strength of an electric push
E. a complete path that electricity flows through
F. a device that turns electricity on or off
G. electricity that builds up on surfaces
H. the flow of electricity

1. _____ static
2. _____ insulator
3. _____ voltage
4. _____ current
5. _____ switch
6. _____ circuit
7. _____ conductor
8. _____ outlet

✏️ **Pick two words. Write a sentence for each one that shows what it means.**

ANSWER KEY

Electricity: Match the Meaning (answers)

Grade 4 vocabulary: circuit, current, conductor, insulator and more

Read each meaning. Write the letter of the meaning next to the word it matches.

A. a place in a wall where you plug things in
B. a material that lets electricity flow through it
C. a material that blocks electricity
D. the strength of an electric push
E. a complete path that electricity flows through
F. a device that turns electricity on or off
G. electricity that builds up on surfaces
H. the flow of electricity

1. G static
2. C insulator
3. D voltage
4. H current
5. F switch
6. E circuit
7. B conductor
8. A outlet
